

IEEE INFOCOM 2019 solicits research papers describing significant and innovative research contributions to the field of computer and data communications networks. We invite submissions on a wide range of research topics, spanning both theoretical and systems research. Topics include but not limited to:

- |   |  |
|---|--|
| 5G networks                                     | Mobile sensing and applications            |
| Big data and machine learning for networks      | Mobility management and models             |
| Cellular networks                               | Multimedia networking                      |
| Cloud computing/mobile cloud computing          | Network economics and pricing              |
| Cognitive radio networks                        | Network management                         |
| Cross-layer optimization and control            | Network measurement and analysis           |
| Crowdsourcing                                   | Network security and privacy               |
| Cyber-physical systems                          | Network virtualization                     |
| Datacenter networking                           | Optical networks                           |
| Energy efficiency in networks                   | Overlay and peer-to-peer networks          |
| Edge and fog computing/networking               | Quality-of-service and resource management |
| Fault tolerance, reliability and survivability  | Router and switch design                   |
| Information security and privacy                | Routing and multicast                      |
| Information-centric networking                  | Scaling laws and fundamental limits        |
| Interference management and mitigation          | Smart grid applications                    |
| Internet architecture                           | Social computing and networks              |
| Internet of Things                              | Software-defined networking                |
| Localization and location-based services        | Vehicular networks                         |
| Medium access control                           | Web applications and content distribution  |
| MIMO-based networking                           | WLAN, WPAN, RFID, and NFC                  |
| mmWave, VLC, full duplex communication networks | Wireless sensor networks                   |

Accepted and presented papers will be published in the IEEE INFOCOM 2019 Conference Proceedings and submitted to IEEE Xplore®. Full details of submission procedures and requirements for authors of accepted papers are available at <http://infocom2019.ieee-infocom.org>.

**Important dates:**

**Abstract Due:**

Tuesday, 24 July 2018  
(11:59pm EDT)

**Full Paper Due:**

Tuesday, 31 July 2018  
(11:59pm EDT)

**Notification of Acceptance:**

Friday, 30 November 2018

**General Chairs**

Marcelo Dias de Amorim  
Sorbonne Université, France  
Serge Fdida  
Sorbonne Université, France

**Technical Program Chairs**

Wenjing Lou  
Virginia Tech, USA  
Giovanni Pau  
Sorbonne Université / UCLA  
Tilman Wolf  
Univ. of Mass. Amherst, USA

**Technical Program Vice-Chair  
for Information System**

Jian Tang  
Syracuse University, USA
